^A First permits-A first permit is issued by evaluating every option of zones the applicant would accept in the order in which they made selections.

^B Second permits-All options of all applicants are evaluated to issue one permit to as many applicants as possible before any second permits are issued. Second permits are issued from the same application.

All permits are issued on a lottery system. There is no second application period.

The above numbers are PRELIMINARY. Permit levels may be revised following reviews of new population data.

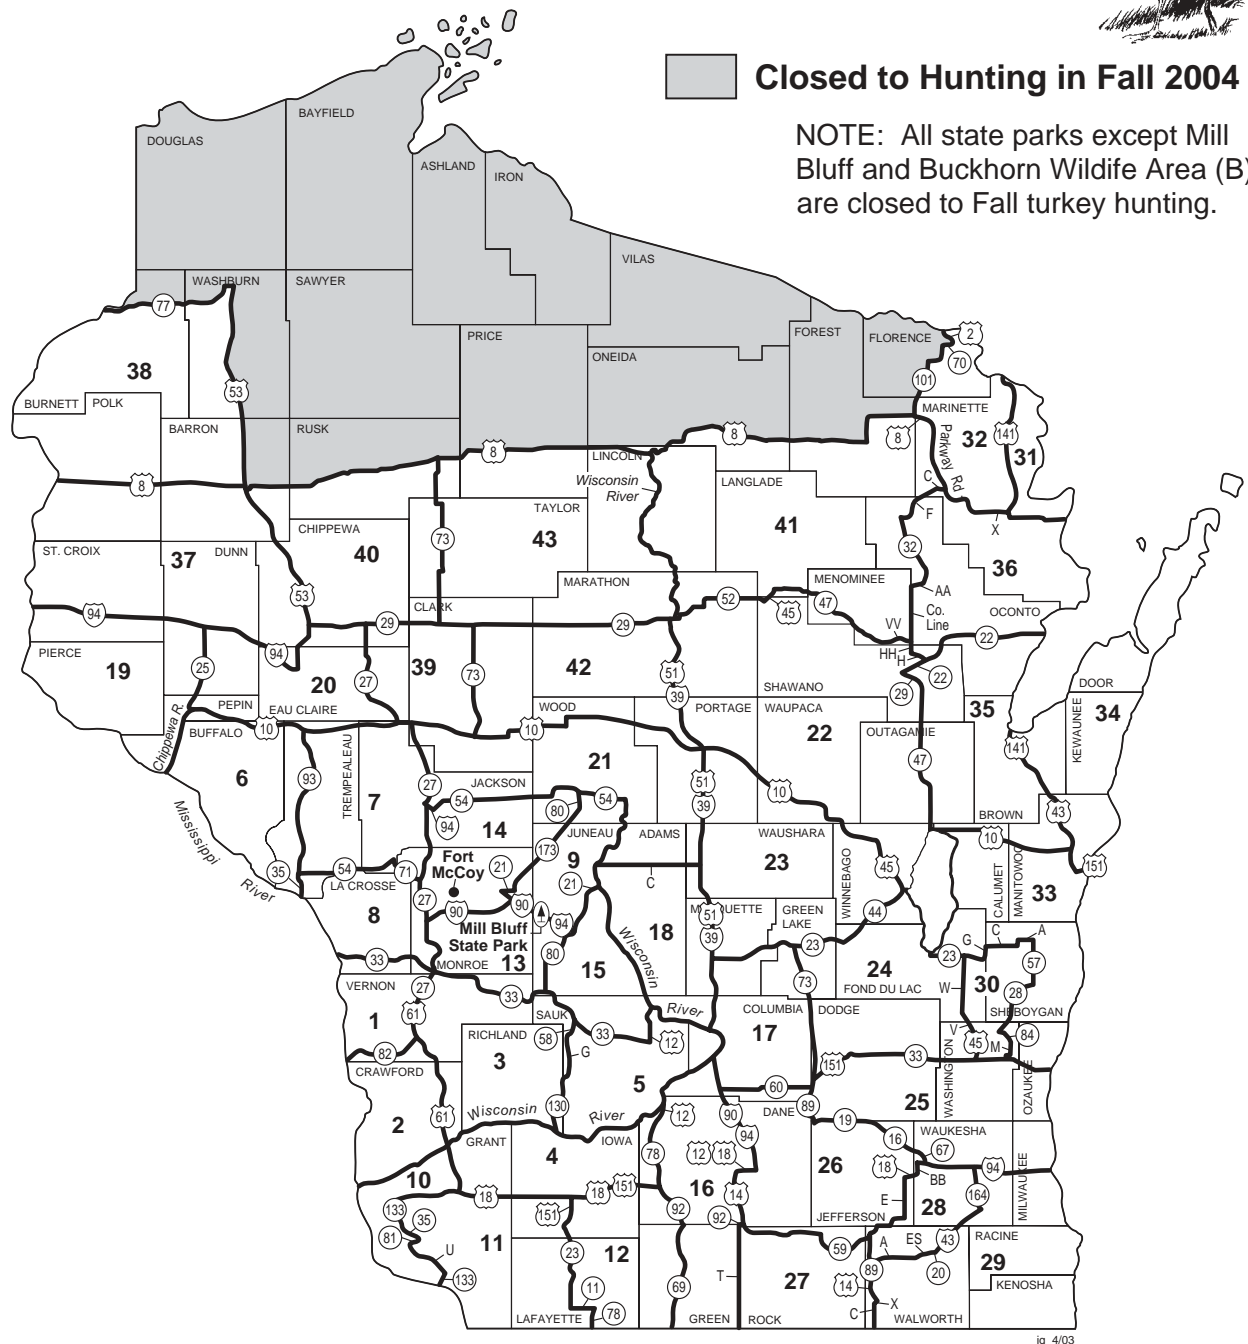

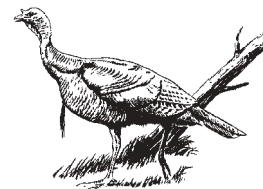

Permit levels are set to allow the maximum recreational opportunities without impacting the turkey population while minimizing hunter interference problems. Permit levels reflect the amount of turkey habitat and turkey population densities and distribution in each zone. Fall turkey hunting is an additional opportunity. The number of permits for fall hunting will be lower than the number for spring hunting.
